# SDX-15ET

## Electric Rebar Wrench

SDX-15ET product image

### WORKING WITH THIS TOOL

A gripping-tool option for rebar and coupler-related turning tasks.

Four clamping ranges and head widths help compare workpiece contact and access.

The same SDX Electric Pipe Wrench models also serve pipe installation and maintenance.

## Technical specifications

| | |
|---|---|
| Maximum torque | **1,200 N·m** |
| Maximum speed | **30 r/min** |
| Power | **900 W** |
| Voltage | **21 V / 110 V / 230 V** |
| Clamping range | **40–80 mm** |
| Head width | **190 mm** |
| Power supply | **Battery / dual-purpose** |
| Net weight | **7.3 kg** |

### Application notes

Clamping range describes the gripping opening, not a rebar connection rating. Maximum torque is not an installation setting or an accuracy guarantee.

### Configuration

Battery / dual-purpose options are listed. Confirm the supplied voltage, battery, power adapter and accessories before ordering.

Also offered as SDX-15ET Electric Pipe Wrench by SDX Tools. Model and technical specifications are unchanged.

Confirm the supplied configuration and application requirements before ordering.
