SDX-400RL

Electric Rebar Coupler Wrench

SDX-400RL product image

WORKING WITH THIS TOOL

Electric rotation for already-threaded rebar and compatible couplers.

Separate bar and coupler ranges help match the tool to the connection system.

Select the model and supplied power arrangement around the installation position.

Technical specifications

Maximum torque	**400 N·m**
Applicable rebar	**16–40 mm**
Coupler outer diameter	**24–60 mm**
Rated power	**2,600 W**
Rotating speed	**50 r/min**
Power supply	**Power line**
Voltage	**110 V / 230 V**
Frequency	**50–60 Hz**
Main body weight	**20.6 kg**
Supported connection configurations	**Horizontal rebar / column rebar / steel coupler / reinforcing cage**

Application notes

Maximum tool torque is not an installation setting or a precision guarantee. Follow the connection-system procedure. Thread cutting and rolling are separate operations.

Configuration

Confirm the supplied power equipment, gripping arrangement and accessories for your workpiece.

Confirm the supplied configuration and application requirements before ordering.
