SDX-500CT

Handheld Rebar Cold-Cutting Saw

Representative series image

WORKING WITH THIS TOOL

Handheld sawing for rebar length adjustment during preparation or installation.

Choose the blade and power arrangement for the material and work position.

Two bar-capacity options let you compare the smaller and larger saw before ordering.

Technical specifications

Cutting capacity	**Rebar up to 50 mm**
Saw blade diameter	**145 mm**
Power supply	**Corded / battery / dual-power options**
Power	**2,800 W**
Speed levels	**1,250 / 1,500 / 1,700 rpm**
Net weight	**3.35 kg (no package)**
Product dimensions	**428 × 161.5 × 96 mm**

Application notes

Confirm the blade, material and supplied voltage before ordering. Bar capacity does not establish capacity for other sections or explosion-proof suitability.

Configuration

Corded, battery and dual-power options are listed. Confirm the supplied blade, voltage and accessories in your quotation.

Confirm the supplied configuration and application requirements before ordering.
