SDX-HRB-16

Handheld Rebar Bending Machine

Representative series image

WORKING WITH THIS TOOL

Hydraulic bending and straightening for the specified main-bar tasks.

Suitable task references include column and shear-wall capping, cage heads and pile-foundation breakout work.

Six diameter ranges help match the tool to the bar and handling requirements.

Technical specifications

Bending range	**4–16 mm**
Power	**1,100 W**
Bending speed	**2–2.5 s**
Machine weight	**13.8 kg**
Packing size	**705 × 190 × 250 mm**

Application notes

Confirm current availability, supplied voltage and configuration before ordering. Bending time depends on the task; follow the project-approved bending or straightening requirements.

Configuration

Discuss bending or straightening, bar grade and working position. Packing dimensions refer to packaging, not the tool envelope.

Confirm the supplied configuration and application requirements before ordering.
